CLIENTS & TESTIMONIALS

Real Results, Proven Impact

Trusted by Corporations Nationwide

Perfect for Personalisation!

We needed a solution that reflected our brand's identity, and LeafyCard delivered.

The customizable e-profile helped us share all the right details while keeping things simple for our partners and clients. Excellent service throughout!

Financial Institution Founder

Makes a Great First Impression!

The ability to customize both the design of the card and the e-profile makes LeafyCard stand out.

It's easy to use, and our clients often comment on how professional it looks. It's a small change that has made a big difference!

Sales Manager, FMCG Industry

Great for App Experience

Thought of sharing after 24 hours since go-live, t
are 160 connected users and many have express
positive feedback on the app experience. Hope t
will be maintained as the user base ramps up.

Done

STEP 01

Start Impletation

Kick off meeting / demo meeting / gather requirements meeting

STEP 02

Hosting

Host LeafyCard Solution in CardBiz Server or Customer Server

STEP 03

Customisation

Extra customisation of the system (Optional)

STEP 04

Production

Deploy & Go Live

Leafy CARD

What are the differences of hosting in CardBiz server or Customer server

Host in CardBiz server		Host in Customer server
Companies who want plug-and-play solution/no IT infra	Best For	Enterprises with strict data & IT compliance
Managed by LeafyCard	Data Management	Full control by customer's IT team
Faster setup, no internal IT involvement	Setup Speed	Slower setup, requires IT coordination
CardBiz manages system updates & backups	Maintenance	Customer IT team manages server & backups
Data stored in PCI-DSS compliant servers	Security	Customer enforces their internal security
